Customer Views on Uretek USA

[The URETEK METHOD] is a way of preserving existing pavements, significantly extending their lives and producing a ride that is more than expectable to the traveling public. It hits all of our needs. We are able to preserve existing resources. We are able to extend the life of our pavements and we're able to meet customer needs. Win. Win. Win.

Pete Rahn, NMSHTD Director

"I would also like to take this opportunity to note the competence and professionalism of the crew who actually performed the work. It was obvious to NDOT staff in attendance at the job site that this URETEK team was knowledgeable, conscientious, and diligent in the execution of their duties. They performed like a well-oiled machine. It merits noting that the repair strategy is expected to remedy the underlying problem for the foreseeable future."

**Kathleen Weaver,
Assistant District Engineer
Nevada DOT**

"Perfect Score: 100/100"

**State of Florida Departement of Transportation
Contractor Field Performance Report:**

"The URETEK name wasn't all that familiar to [the city manager and council], and the process wasn't traditional. But URETEK USA offered us:

- 1) The fastest and least troublesome procedure
- 2) 10-year materials guarantee
- 3) An agreement not to bill us if their procedure proved unsatisfactory

I was convinced it was too good to pass up, and the technology made sense."

**Thomas G. Wendorf, PE, Missouri City Public
Works Director**
